

'Lone assassin' conclusion backed

AP

KENNEDY: Autopsy
filed reviewed

A 1992 analysis of the film that recorded John F. Kennedy's assassination supports the conclusion that a lone gunman killed the president almost 30 years ago, a report in today's *Journal of the American Medical Association* says. Author John Lattimer, a Columbia University urology professor emeritus, was the first non-government investigator to examine the JFK autopsy file. Critics say the report offers nothing new and the analysis fails to resolve controversy over possible other gunmen.
